The Humanitarian Data Exchange
Find, share and use humanitarian data all in one place

The Humanitarian Data Exchange (HDX) is an open platform for sharing data. The goal of HDX is to make humanitarian data easy to find and use for analysis. Launched in July 2014, HDX has been accessed by thousands of users in every country and brings together more than 17,000 datasets from 255 partner organizations.

The Humanitarian Exchange Language
A simple standard for messy data

The Humanitarian Exchange Language (HXL) is a data standard. It is based on spreadsheet formats such as CSV or Excel, but it adds hashtags with semantic information to allow software to validate, clean, merge and analyse data more easily.
